OBJECTIVE

Motivated Computer Science student at Warsaw University of Technology with a strong foundation in full-stack and web application development. Passionate about continuous learning, coding and self-development. Eager to apply software engineering skills and team collaboration in a challenging internship environment.

EDUCATION

Warsaw University of Technology, Warsaw, Poland

Oct 2023 – Feb 2027

Bachelor of Engineering in Computer Science

GPA: 4.18/5.0

Relevant coursework: Data Structures & Algorithms (Python), Operating Systems (C, Bash), Databases (SQL, Oracle), Computer Architecture (x86), Object-Oriented Programming (C++), Application Programming (Java, React), Introduction to AI (Python, NumPy), Software Craftsmanship (Design Patterns, CI/CD)

Technische Universität Berlin, Berlin, Germany

Mar 2026 – Jul 2026

Erasmus Exchange

Planned Erasmus Exchange for spring semester – nomination confirmed.

SKILLS

Programming languages: C, C++, Python, Java, SQL, JavaScript, TypeScript, Rust (basics)

Frameworks/Tools: React, Django, Node.js, Spring Boot (basics), Git, Docker

Other: MySQL, PostgreSQL, Oracle, MongoDB, REST API, DSA, Design Patterns, CI/CD, TDD

Soft skills: Problem Solving, Time Management, Teamwork, Creativity, Adaptability

Languages: Polish (Native), English (C2), Japanese (N3), German (B1), French (A1)

PROJECT EXPERIENCE

Semi-automatic CSV File Translation Tool (Typescript, Django, Rust, MongoDB, Docker, Redis)

Led development of a full-stack web application for translating CSV files with AI. Responsible for building the frontend in React/Next.js with Tailwind and shadcn/ui, implementing a high-performance ML translation module in Rust using Hugging Face MarianMT, and managing Docker-based deployment and CI/CD pipelines. The app enables CSV parsing with row and column selection, translation progress saving in MongoDB, and Redis-based caching. The project emphasizes UX, modularity, and performance.

Book Collection Management Web Application (Django, Rust, PostgreSQL, Docker, CI/CD)

Built and documented a scalable backend in Django and PostgreSQL for a Goodreads-style app with features like advanced book filtering, user reviews, ratings and authentication. Integrated REST APIs for seamless data exchange between frontend (Rust-based) and backend as well as full-featured user authentication.

Quizlet-like Flashcard Web Application (React, Spring Boot, MySQL, Docker)

Collaboratively developed a spaced repetition learning platform as a frontend developer. Users can register, create folders and flashcards, and track their study progress. Features include secure authentication, flashcard import/export (PDF, TXT), a spaced repetition scheduler, detailed statistics, and advanced filtering. Deployed in Docker containers for scalability.

Personal Finance Management Desktop App (Java, Swing, MySQL, JUnit)

Individually developed a Java desktop application for managing personal finances. Features include secure login with Jbcrypt, transaction tracking, real-time balance updates, and exporting reports to multiple formats (PDF, XLSX, TXT, CSV) using iText and Apache POI.

I hereby consent to the processing of this CV and the personal data contained within, by anyone who receives this document for the sole purpose of considering my application for employment opportunities.
